### **AMENDMENT ENTRY**

Amendment of 2/14/06 has been entered. Claims 1-9 And 11-19 are pending and are under subject to restriction. Restriction is required under 35 U.S.C. 121 and 372.

### **RESTRICTION GOUPS**

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9, drawn to methods of obtaining antibody producing cells and of isolating antibodies therefrom.

Group II, claim(s) 11-19, drawn to antibodies and pharmaceutical compositions thereof.

### **REASONS INVENTIONS LACK UNITY**

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Applicant's contribution over the prior art appears to be a method of obtaining antibody producing cells and of isolating antibodies therefrom. However, no matter how the antibody producing cells and antibodies therefrom may be obtained, the cells and/or the antibodies do not differ from those obtained by methods of the prior art. Any monoclonal antibody inherently has a particular binding specificity and affinity for a particular epitope, irrespective of how the antibody producing cells may have been selected. Therefore, the instantly obtained cells and isolated antibodies do not materially differ from the hybridomas/engineered cells and their secreted antibodies that have been around since the age of monoclonal antibodies began in the 1970s. As such, Invention II does not provide a contribution over the prior art, as is required for the claims to have Unity of invention.
